

Project information

New construction, Hofgarten Solingen

Shopping centre with currently 75 shops and 16 restaurants/cafes

Performed by Heinz Mänz Ausbau GmbH: Drywall installation and wooden doors in the public areas

Solingen Shopping Centre GmbH, a joint venture between MAB Development and Sonae Sierra, has realised the shopping centre above. The centre comprises a total of approx. 29,000 square metres over three levels and a three-level car park with approx. 600 parking spaces. This shopping centre was constructed over a period of approx. 2 years, including demolition, with an investment volume of 130 million euros.

With 65 installers, Heinz Mänz Ausbau GmbH realised the public drywall at peak times. The installation included the perforated plasterboard ceiling with pop-ups and slanted barrel vaults in the mall areas, an acoustic wall with a slant of approx. 85 degrees and a height of approx. 12 m in the skylight area, as well as diamond-shaped cove lighting in the food court area.
