

■ Industrial Soundproofing

... committed to quality

Bohle's Services for Industrial Soundproofing

We manufacture soundproofed hoods, enclosures, cabins and other soundproofed constructions tailored to the specifications of our customers and in accordance with geometric and soundproofing requirements.

Our services include:

- Noise measurement and noise reduction specification
- Planning and design
- Manufacture, delivery and installation

Besides our classic work in thermal, sound and fire insulation, we also have many years of experience in the manufacture of highly effective soundproofing and sound-absorbing constructions for various industries, e.g.:

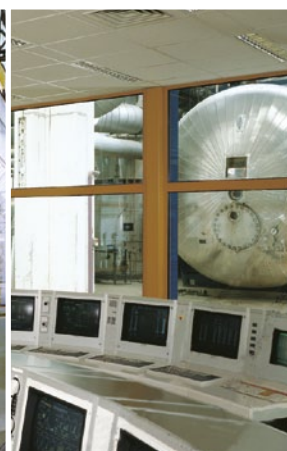

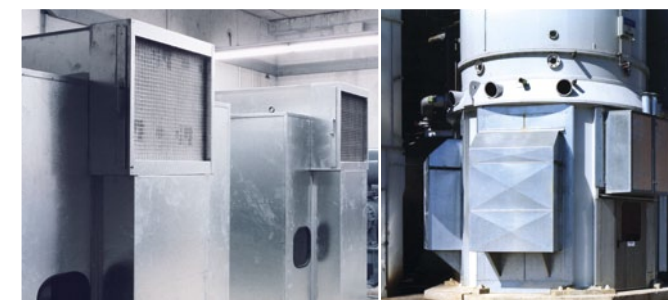

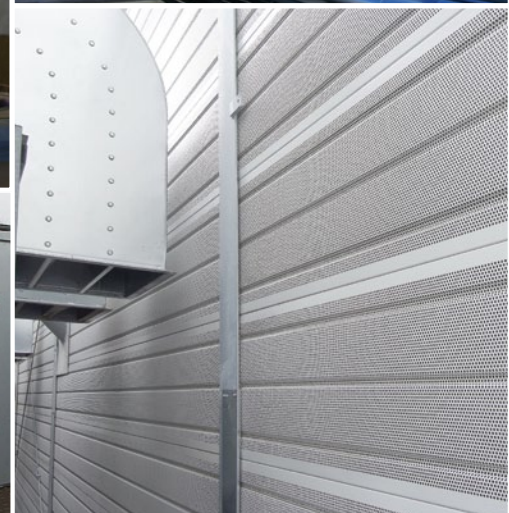

- Mechanical and plant engineering
- Sewage treatment plants
- Utility companies
- Chemical industry
- Automotive industry
- Electrical engineering industry
- Drinks, sugar and food industries
- Steel and concrete processing industries
- Foundries
- Manufacturers of air and gas compressors, turbines, blowers, pumps and hydraulic units
- General areas with noise generation

Noise Produces Stress and Causes Illness

Increasingly higher production rates and shorter delivery times demand economical production processes. That results in, for example, faster-running and thus noisier machinery. The noise level is often annoying and unacceptable for employees. Concentration loss, demotivation and illness are the results. Besides machinery design changes, secondary soundproofing measures, such as island solutions, are often the only solution for noise reduction. Numerous solution types and our many years of experience contribute to the fact that soundproofing covers hardly impair the operability or inspection simplicity, even in the case of a subsequent installation. The acceptance of the soundproofing measure is significantly increased by involvement of the operating employees in the design planning stage.

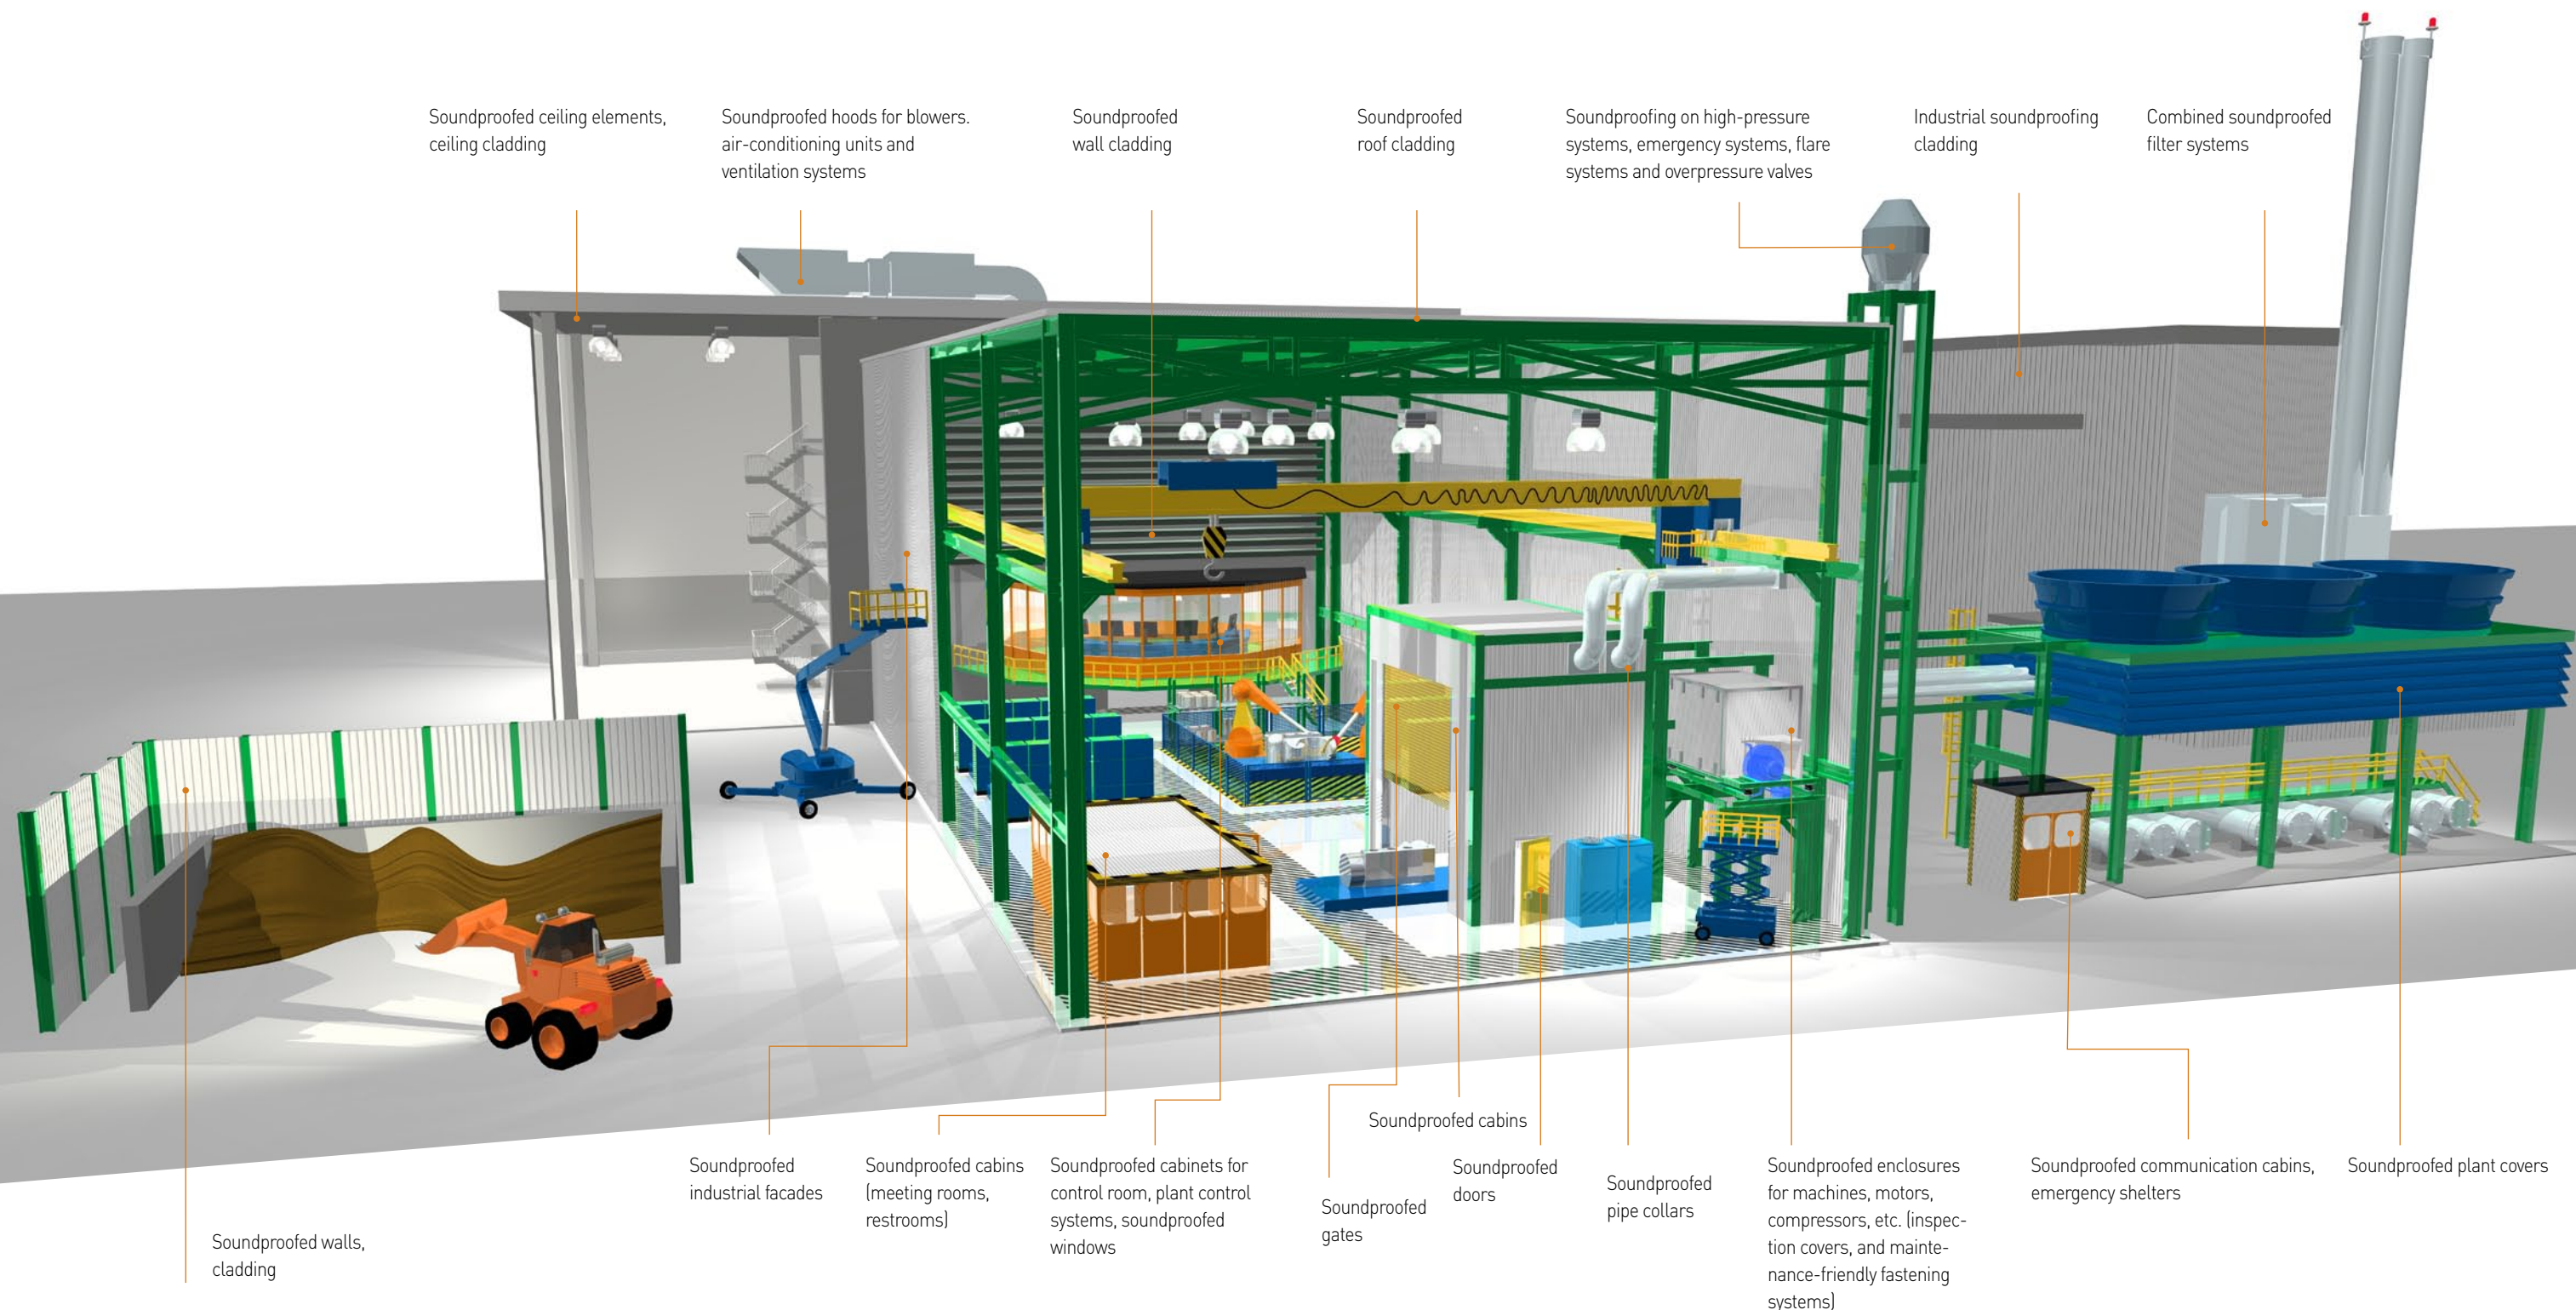

We offer the following special equipment:

- Lighting
- Ventilation, air conditioning and heating
- Access hatches, doors and windows
- Cavity floors
- Additional corrosion protection
- Technical documentation

Possible Industrial Soundproofing Solutions

Bohle Quality for the Protection of Health and the Environment

The Bohle Group Committed to quality

- Insulation Technology
- Interior Fitting
- Fire Protection
- Metal Construction
